

Diabetic Complications: Diagnosis and Management

2012 Health Professional Training Program

OVERVIEW

The primary aim of diabetes management is the prevention of diabetes complications. These may be both acute and long term, and early detection and treatment are the keys to successful outcomes.

This one day program will focus on five key areas: the heart, eyes, feet, kidneys and hypoglycaemia.

TOPICS WILL INCLUDE:

- Screening
- Prevention
- Signs and symptoms
- Management
